 Philadelphia - USA

 25 Years Old

 French B Driver's Licence

 Amir MOUSSOUS

Professional Skills

Programming language :

Java , C , C# , SQL , JavaScript ,
VBA , Kotlin

Data Science

Python , R , Stata , MATLAB

Library Data Science

NumPy , Pandas , Matplotlib ,
Scikit-learn , TensorFlow

Clustering Methods

K-Means , DBSCAN , KNN , GLS ,
GMM

IDE and tools :

Anaconda , Visual Studio ,
GitHub , Fast API ,
Docker , MySQL

Data visualization :

Power BI , TABLEAU , EXCEL

CRM :

SAP , Salesforce

Language

French : Native Language
English : C1

Certifications

- AI : Build AI + LLM & ChatGPT
- Label HandiManagement
- AWS Cloud Partitioner Essentials
- Microsoft Azure Cloud
- Microsoft Azure Data
- IBM Watson Studio Data

Education

2021 - 2023

SKEMA Paris – Business School
PGE - Dual degree Engineer Manager
M2 : MSc Data , Digital Business & Artificial Intelligence

2021 - 2022

North Carolina States University – USA
M1 : Business Administration and Management

2019 - 2022

ESIEA Paris – Engineering School
Major : **Software Engineering**
Minor : **Management & Entrepreneurship**
Computer Engineering - Big Data - Data Science - Optimization

Work Experience

July 2024
to May. 2025

VIE - Data Analyst
SAINT-GOBAIN - Philadelphia, US
- I develop detailed procurement reports and create visual dashboards using BI tools to track key performance indicators (KPIs).
- I work on data science projects to optimize procurement processes through data analysis, predictive modeling, and AI integration.
Result : Boosted purchasing team efficiency with the creation of 8 new dashboards and AI integration.

May to Dec. 2023

IT CRM Business Analyst
LVMH - Paris, FR
- I've led data analysis projects, translating complex data into actionable insights for strategic decision-making.
- Analyzed and optimized CRM systems, enhancing CRM processes.
Result: Developed a script to analyze data and identify potential client outliers, improving CRM performance through interactive dashboard creation.

May to Aug. 2022

Data & Development Engineer
SAFRAN - Paris, FR
- Led the development and optimization of data and workstation solutions.
- Collaborated with cross-functional teams to identify technical requirements and deliver tailored IT solutions.
Result: Built a comprehensive Power BI "MASTER Dashboard" for analyzing employee data and improved scripts for more efficient information retrieval.

April 2021 to
Sep. 2021

Business Intelligence Engineer
SAFRAN - Paris, FR
- Innovated and improved pilotage tool functionalities, significantly enhancing data processing capabilities and operational efficiency at Safran.
- Conducted in-depth analysis and troubleshooting, ensuring tool performance.
Result: Developed a central Power BI dashboard aggregating data from multiple databases to provide the purchasing team with client insights. Created 3 VBA scripts in Excel to help the VP identify key performance indicators (KPIs).

Sep. 2021 to
Jan. 2022

Project manager Unity
MC2I - Paris, FR
- Directed the Project Unity, managing all phases from conception to delivery.
Result: Successfully implemented the software on the MC2I site, enabling new employees and clients to explore the premises in 3D and learn more about the company.
